Nan Ya Plastics Corp.

COMPOSITE

Maintenance-free smooth white or woodgrain composite offers all the strength and convenience of wood with enhanced properties, providing a moisture and damage resistant product suited for the Canadian climate.

Though machined with the same process as traditional wood door frames, solid composite provides twice the holding power of wood. While similar door frames may crack or bow under the intense cycle of the Canadian climate, Nan Ya's composite door frames have proven to stand tough against the test of time.

Research shows that in most forced entry situations, door system failure lies within the frame, not the door slab. Our composite frame will not splinter or crack, providing a virtually indestructible product and reducing forced entry concerns.

Nan Ya's premium composite frames – an innovative alternative to traditional wood frame construction.

WHY COMPOSITE MOULDINGS?

- Textured woodgrain or pre-pigmented smooth white frame components are a blend of PVC and wood fiber composite substrate.
- Solid composite provides twice the holding power of wood.
- Will not discolour, absorb moisture, splinter, or rot.
- Textured woodgrain has a realistic, rich woodgrain appearance.
- Jamb can be painted or stained to your requirements.

ARCHITECTURALLY DESIGNED

DOOR PULLS

Three families of door pulls to choose from: SoftMet, NoirTek, and MegaTek. Choose from a 16", 36", or 60" stainless steel door pull and then choose your locking hardware. All door pull systems are constructed with two architectural grade roller latches.

NOIRTEK™ COLLECTION

(Straight RM3910 / Offset RM3940)

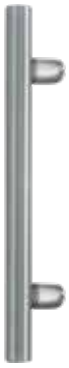
NoirTek's durable black hard coat anodized grip complements many design schemes and is an appealing finish on its own.

- 16" x 1-1/4" diameter straight or offset pull
- Black hard coat anodized grip, stainless steel mounts

Size:

MEGATEK™ COLLECTION

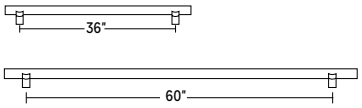
(Offset RM3311)



Ladder pulls are an artful and functional solution for a dramatic entrance design.

- 36" or 60" x 1-1/4" diameter offset pull
- Polished stainless steel

Sizes:

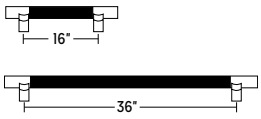


SOFTMET™ COLLECTION

(Straight RM2510 / Offset RM2540)

- Durable, weather-resistant black Santoprene™ grip—a high performance engineered thermoplastic elastomer
- 16" x 1-1/4" diameter straight or offset pull or 36" x 1-1/4" diameter offset pull
- Stainless steel ends and mounts

Sizes:



Offset vs. Straight

Offset vs. straight product styling is usually determined based on the aesthetics you are hoping to achieve and the functionality required to ensure you have a product which meets your everyday needs.

Offset pulls are designed to incorporate a deadbolt along the length of the pull, allowing additional clearance when locking/unlocking the deadbolt, whereas a straight pull incorporates the deadbolt installation above the pull. Architectural 16" pulls are available in either straight or offset, while longer pulls—36" and 60" pulls—are available as an offset only.

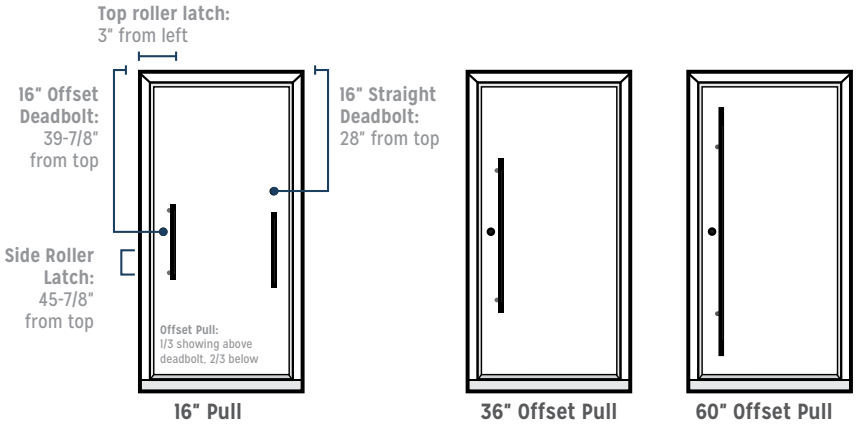
ARCHITECTURALLY DESIGNED

DOOR PULLS

Door Pull Visualizer

Determine Your Desired Product Style



Offset pulls are designed to incorporate a deadbolt along the length of the pull, whereas a straight pull incorporates the deadbolt installation above the pull.

Disclaimer: All measurements are calculated from the top left of door slab. Some regions may require specific drill locations for deadlock options. Contact your local building inspector for more information.

Back-to-Back Mounting

Back-to-back mounting features two door pulls which are connected through the door, each pull opposite the other.

All Nan Ya fiberglass slabs feature a full height lock block for lifelong performance.

LOCKING HARDWARE

Roller Latch

RL30

- Maximum projection of the roller is 3/8" allowing for variance in the door clearance
- Nylon roller standard
- Stainless steel construction

IVES

Available Finishes:

C-32D Stainless Steel

C-ID Matte Black

Note: *Some regions may require a double latching system to meet local building codes. Contact your local building inspector for more information.*

High Security Mortise

L460P

- High security mortise lock
- Minimalistic cylinder for architectural or European design
- Solid stainless steel and brass components
- The best in traditional keyed entry locks
- 3 year limited manufacturer's warranty
- Exceeds Grade 1 testing

ALLEGION

Available Finishes:

626 Satin Chrome
